Usable saved registration here?
Saved certificates for the SSID + saved realm records
Compare advertised security with the saved certificates:
REGISTERED, or CONFLICT on a mismatch. Read the site and match accounts
alt
[Local account]
Pins from the saved site certificate (aaa entry)
[Visitor with a saved realm record]
Verify the saved record again: signature, federation, realm,
expiry. A tampered store gives nothing
[Visitor without a saved record]
Network supports onboarding: continue with Flow 3.
Otherwise: sign-in sheet, or a block
decide(), as in Flow 3
Phase 2, the same as in Flow 3
Load the password
addNetworkSuggestions: pinned CA + server name, real identity
Associate
Access-Request, outer anonymous@realm
Proxy by realm
TLS certificate, checked against the pins
Inner exchange with the real identity
Accept (through SPR and AP)
Connected
Connected with the pinned profile
